Summary

ISC2 Certified in Cybersecurity (CC) professional with a strong foundation in enterprise threat management and live SOC operations. I'm experienced at analyzing SIEM alerts, managing asset vulnerabilities, and translating regulatory frameworks like EU DORA into physical and technical safeguards. I'm proactive defender committed to protecting critical infrastructure through continuous action.

Certifications

Certified in Cybersecurity ISC2	01/31/2025
------------------------------------	------------

Education

LeMoyne College Cybersecurity	Bachelors of Arts
----------------------------------	-------------------

Experience

Le Moyne Security Operation Center SOC Analyst Intern	Syracuse, NY 08/2023 – 12/2023
• Monitored real-time event logs and security alerts within CrowdStrike to identify, isolate, and mitigate potential system anomalies. • Evaluated daily threat feeds for indicators of compromise to proactively pivot on network data and update alerts for emerging vectors. • Investigated suspicious network traffic patterns and endpoint activities, ensuring rapid escalation and documentation of potential security incidents. • Authored and distributed campus-wide security bulletins regarding active threat vectors and modern phishing trends.	
VanEck Cybersecurity Analyst Intern	New York, NY 06/2024 – 08/2024
• Utilized Lansweeper to map assets, identify endpoint vulnerabilities, and coordinate patch compliance tracking across the organization. • Analyzed organizational data workflows and drafted comprehensive AI usage guidelines to ensure corporate alignment with EU DORA regulatory standards. • Performed user access attestations and audits to enforce strict least-privilege access controls across the organization. • Partnered with cross-functional teams to deploy and document a centralized enterprise password management solution.	
Le Moyne IT Systems and Network Services Desktop Associate	Syracuse, NY 01/2024 – 04/2025
• Administered group policies, and access rights within Active Directory to ensure access to needed applications and printers.	

- Managed the deployment, staging, and software imaging of hardware assets, ensuring consistent configurations across Windows and iOS environments.
- Troubleshoot hardware, connectivity issues, maintaining high uptime for critical end-user systems and devices.
- Provided technical support to resolve endpoint vulnerabilities, updates, and configuration issues while maintaining clear ticketing documentation.

Extell Development The Carlton House

Relief Hallperson

New York, NY

07/2025 – 12/2025

- Delivered exceptional customer service to diverse shareholder groups including residents, guests, and management while maintaining professional security protocols.
- Managed sensitive communications and confidential information flow between residents, management, and service providers, ensuring data privacy compliance.
- Executed multi-tasking operations in fast-paced environment, prioritizing critical security functions while maintaining operational efficiency.
- Responded quickly to security incidents and resident requests.
- Managed building access control systems by monitoring visitor entry/exit, verifying resident credentials, and maintaining secure perimeter through doorperson duties.

Le Moyne College HEOP/AHANA Office

Student Assistant

Syracuse, NY

01/2022 – 05/2022

- Executed hardware lifecycle maintenance and routine systems troubleshooting for a campus-wide device loan program.
- Planned and managed events for the students on campus.
- Managed student communications and baseline administrative data tracking to streamline facility operations.

Projects

- Network Building Lab
- Designed and deployed a simulated multi-subnet clinic network within a virtualized environment, successfully segmenting guest, administrative, and clinical infrastructure.
 - Configured strict firewall rules to drop unauthorized traffic while facilitating secure, fast Wifi across the office.
 - Implemented enterprise-grade WPA3 router configurations and hardened local device network adapters to eliminate baseline credential sniffing vulnerabilities.

- Website Security / Website Development
- Establishing modern domain registrations and managing authoritative DNS configurations (A, CNAME, MX, TXT records).
 - Deployed automated SSL/TLS certificates and implemented DNSSEC protocols to protect transit data against cache poisoning and interception vectors.
 - Created robust Content Security Policies (CSP) and HTTP security headers to mitigate Cross-Site Scripting (XSS) and clickjacking risks.
